-

EXPERIENCE

MISYS FINANCIAL SOFTWARE (*Financial Services Software provider; Revenues of US \$900M*)

Bangalore

Software Engineer

September 2013 – Present

Associate Software Engineer

July 2011 – September 2013

Designed and developed technology solutions for end to end lending - from loan establishment through to processing and servicing.

Leadership

- Led a team of 6 engineers in the loan enhancements project of the product FusionBanking Essence 4.0, for which The Student Loans Company in UK signed a deal worth over GBP 5.9M.
- Set an example for the team by single-handedly delivering a complex lending requirement with zero defects.
- Mentored and trained 3 new employees in regard to understanding banking software system and developing new functionalities.

Teamwork

- Collaborated with system experts to improve the performance of the loan establishment process by 50%.
 - Critical for a large upgrade deal worth over €2.5M for FusionBanking Essence 4.0 at CRDB Bank, Tanzania.
- Reduced software defects by 20% by fostering closer cooperation between development and testing teams.

Client Interaction

- Played a critical role in the multi-million dollar implementation of flagship software, Bankfusion Universal Banking (BFUB) 2.01, in Cooperative Bank of Kenya (COPK).
 - This implementation was recognized by Misys as the best implementation of the product till date.
- Presented recommendations to executives in COPK on strategies to migrate critical customer data and to correct the invalid data from the former banking software. Recommendations were approved and adopted.
- Spearheaded the performance improvement of the End of Day (EOD) lending batch processes by 20-30% at COPK.
- Answered with ease both functional and technical queries on BFUB 2.01 put forth by the software consultants in the Misys Academy Team, UK. Efforts led to a faster certification of the software for early adoption by COPK.

Planning

- Assisted line manager in strategic development planning and resource allocation.

Process Improvement

- Advised senior management on implementing code review tools to improve productivity leading to defect rate reduction by 10%.

Awards and Achievements

- Achieved first tier rank (*Top 1%*) in performance reviews for each annual evaluation period.
- Received promotion to Software Engineer in two years (standard three).
- Awarded 5 Misys Spot Awards for excellent performance and strong leadership.

AJWAN TRADING ENTERPRISE

Kuwait

Summer Intern

May 2010

- Guided a team of multinational students to develop inventory management software while attending technology training sessions.
-
