

"I cannot stress how both insightful and helpful the MBA Early Edge is. Business school is not something you can prepare for in a few months; given today's ultra-competitive landscape it's imperative that you start preparing early. Given my demanding job the MBA Early Edge Package was perfect for me – my counselor worked with me to assess my current situation, strengths and weaknesses, based on all the different areas of the application, and basically gave me a road-map which would help me prepare to apply to the schools of my choice."
