This answer/explanation page will allow you to conveniently see your full diagnostic on a single screen. This makes it easier to analyze your test performance and navigate the questions.

COLUMN #

This is the question number.

COLUMN Yr: your answer

This is the answer you have given. If it is incorrect, it is shown in red.

COLUMN Ri: right answer

This is the correct answer to the question.

COLUMN Ti: time elapsed

This is the amount of time you spent on the given question.

COLUMN TP: Test Pacer Analysis (patent-pending)

This is the amount of time you spent on the question as a fraction of the time allocated to that question. The ideal time you should spend on a question varies because the CAT (Computer-Adaptive Test) format values the early questions much more than the later questions. Early questions should have more time allocated to them and later questions should have less time allocated to them. For more information on how the GMAT and GRE CAT work, go to 800score.com/info for the GMAT or 800score.com/greinfo for the GRE.

If you are a low scorer (below 50 percentile), your simple strategy should be to get the early (valuable) questions right and then hurry through the rest of the test (and avoid the steep penalty for not doing all the questions). Thus, the Test Pacer assigns a
